Facing wartime : the civilian gas mask's rise and fall, 1941-1945 Conclusion Epilogue: Five brief ways of looking at a gas mask

Résumé ou extrait : "It was a bitterly cold evening, and I had just finished giving a talk that shared the glimmerings of a new research project that looked seriously at how the gas mask, a peculiar object that came into being in 1915, could elucidate what it meant to face total war. At that point, the project had begun by asking why many countries including Britain by 1939 to distribute tens of millions of gas masks as the primary means of protecting their inhabitants against the worst elements of modern war. After I had finished, an older man buttoning his coat and tying his woolen scarf around his neck, came up to me to

report that my remarks had made him recall vividly some of his earliest fears from his childhood in England, when his brother would put on his gas mask and chase him around their house." (éditeur)
This vivid and accessible history of the civilian gas mask from the years 1915-1945 reveals the shocking consequences of modern, total war and how ordinary civilians learned to face its terrors. It demonstrates the profound impact of new technologies of warfare on imperial Britain's culture, politics, and society
