Résumé ou extrait : 'More than anyone alive, Branko Milanovic was likely to propound a grand theory of our perplexing global moment, rooted in data and facts. With brilliance, panache, and reliability, he has done it' Samuel Moyn 'A must read for anyone concerned about the future of the world order' Gordon Brown 'Simultaneously panoramic and telescopic, there is no better account of how we have got to where we are, and no clearer-eyed analysis of where we might go next' Daniel Markovitz A world-leading economist guides us through the ruins of the current world order: where do we go next ? Global neoliberalism is on its last legs, while a new international economic order is taking hold. Trade blocs, tariff wars, economic sanctions, and national champions are in; nationalism, anti-immigration movements and the far-right are on the rise. Liberalism is being rejected by the civic realm, as the status quo of the past fifty years crumbles. What will take its place ? Drawing on original research, leading economist Branko Milanovic reveals the seismic shifts that are shaping our world. He details the facts: how the rising economic power of Asia is creating a new global 'middle class' in the greatest reshuffle of incomes since the Industrial Revolution. He explores our fears: why are we becoming increasingly unhappy, when the world is becoming richer and more equal ? And he shows us the fight ahead: as plutocracy returns, global war threatens, and a new system silently shapes our nations, driving malcontent to breaking point. In The Great Global Transformation, Milanovic provides an invaluable guide to the new 21st century. 'Simultaneously panoramic and telescopic... There is no better account of how we have got to where we are, and no clearer-eyed analysis of where we might go next' Daniel Markovits 'No one

describes better and quantifies with such precision the global transformations now underway than Branko Milanovic. A must read for anyone concerned about the future of the world order' Gordon Brown.
