GLOSSARY Index Back cover

Résumé ou extrait : "The author believes that all international strategic manoeuvrings in the region, mostly rely on information that is entirely fabricated and portrayed by Pakistan's adversaries to harm its national interests. In his opinion, knowing a realistic picture of Pakistan and the Pakistan army in its true perspective, is important not only for people inside the country but also for the international community, so that they may pursue their relationships and cooperation in the region based on ground realities. Considering his personal experiences in security and counterintelligence operations during last four decades, he thought of writing this book. He believes that his narrative provides a virtuous material for analysts to ponder history through an authentic premise and predict futuristic security scenarios based on a realistic perspective. To present his arguments with facts and figures, in a cohesive manner, the author has presented the narrative in shape of a memoir of his lifelong experiences in a cohesive manner, taking full measure of the individuals, institutions and organisations that made a strong impression on his life. During the process, an effort has been made to take the readers along the same curve he followed so that they can clearly grasp the dynamics that drives the life of a Pakistani soldier." (jaquette)
