Maritime and continental strategies : an important question of emphasis / Roger W. Barnett 15. Reflections

Résumé ou extrait : "This multi-authored volume is an important resource for professionals and students alike who seek information on the use of naval forces in wartime. It breaks new ground in theorizing

about seapower and in applying principles to historical examples. Individual essays provide general theories of maritime strategy, histories of seapower in action from the Peloponnesian wars onward, and contemporary views of the strategic uses of navies in both the West and East." (jaquette)
