Note sur le contenu : Giulio Douhet and the origins of airpower theory / Phillip S. Meilinger Trenchard, Slessor, and Royal Air Force doctrine before World War II / Phillip S. Meilinger Molding airpower convictions : development and legacy of William Mitchell's strategic thought / Mark A. Clodfelter The influence of aviation on the evolution of American naval thought / David R. Mets 5. Airpower thought in continental Europe between the Wars / James S. Corum Interwar US Army Aviation and the Air Corps Tactical School : incubators of American airpower / Peter R. Faber Alexander P. de Seversky and American airpower / Phillip S. Meilinger Strategic airpower and nuclear strategy : new theory for not-quite-so-new apocalypse / Karl P. Mueller Air theory, Air Force, and low intensity conflict : a short journey to confusion / Dennis M. Drew John Boyd and John Warden : airpower's quest for strategic paralysis / David S. Fadok An ambivalent partnership : US Army and Air Force perspectives on air-ground operations / Harold L. Winton The evolution of NATO air doctrine / Maris "Buster" McCrabb Soviet military air doctrine and air theory : change through the light of a storm / Edward J. Felker Ascendant realms : characteristics of air power and space power / Bruce M. DeBlois Reflections on the search for airpower theory / I.B. Holley, Jr

Résumé ou extrait : Présentation de l'éditeur : "Even though Airpower has come to play an increasingly

important role in both peace and war, the basic concepts that define and govern airpower remain obscure even to professional military officers. It is important for airmen to understand the theory of airpower. Airpower may not always provide the only solution to a problem, but the advantages of speed, range, flexibility and vantage point offered through the air and space environment make airpower a powerful instrument for meeting the needs of the nation. War has been fundamentally transformed by the advent of the airplane. This book is a valuable means of increasing our expertise in the employment of airpower. It offers an outstanding overview of airpower theories and will serve as the basic text on this vital subject. It will serve as a primer and an analytical treatment of airpower theory for students of modern war. The contributors, all from the School of Advanced Airpower Studies : the descendant of the Air Corps Tactical School : at Maxwell AFB, Alabama, USA, are highly qualified experts to tackle this subject."
