Mention d'édition : 2nd edition

Publication : Washington : Georgetown University press

Date de copyright : C 2022

Description matérielle : 1 vol. (XVII-258 p.) : ill. ; 26 cm

ISBN : 978-1-64712-250-8

1-64712-250-3

978-1-64712-249-2

1-64712-249-X

EAN : 9781647122508 br.

Classification décimale Dewey : 358.414

Note sur les bibliographies et les index : Notes bibliogr. Index

Résumé ou extrait : "Military Strategy, Joint Operations, and Airpower introduces students to contemporary strategy and the operational level of war, particularly as it relates to airpower. Developed as foundational reading for all US Air Force Academy cadets, this intermediate textbook is designed to close the gap between military theory and practice. It covers strategic foundations; operational design and joint-service operations; the air, space, and cyber capabilities that comprise modern airpower; and contemporary challenges in the application of strategy. In this second edition, each chapter has been updated and revised, and several sections have been expanded. Part II Military Forces and the Joint Fight is now has separate chapters about each service in addition to a chapter on joint structure. Similarly, operational design is expanded from one to four chapters to provide a more thorough step-by-step guide

through the process. New chapters in this second edition include "Integrating the Instruments of Power," "The Spectrum of Conflict and Range of Military Operations," and "The Nuclear Weapons Triad and Missile Defense." This book's contributing authors and editors include both military practitioners and scholars of security studies, political science, and history. In addition to being required reading for Air Force cadets and ROTC students, the book will provide an essential overview of strategy and practice for anyone interested in modern airpower."
